

BioRational Sand Fly Injection Control System

Patent Pending

FEATURES

- 3 Point Cat. 1 & 2 Tractor Mount
- ATV or Argo Mount
- 25 Gallon Formulation Tank
- 12 Volt Liquid Pump
- Dual Output for Manifold or Spray Wand Dispersal
- Aluminum Liquid Manifold
- High Capacity Strainer
- Weatherproof Remote Pump Switch
- All Powder Coated Steel-Heavy Duty Frame
- Quick Attach Grooming Tines
- Steel Liquid Knives
- Simple Operation

A unique and innovative approach to effective sand fly control is simple with the Sand Fly Injection Control System. The durable frame is flexible for multiple mounting options and is easily connected to 3 point systems. The injection options allow for fast broad area or spot treatments on public or private beaches, or in specific inland target wetlands. Especially designed for resort use, the Sand Fly Injection System will aid staff in providing protection of visitors from the nuisance of biting flies and, as an added benefit, grooms and cleans beaches of debris. In combination with other treatment techniques, the Sand Fly Injection System rounds out the arsenal of equipment available to accomplish non-intrusive management methods (Patents Pending) and helps assure your guests of a more enjoyable vacation experience.
